5. Allocation of shares, exchange ratio and Spin off premium (art. 241 let. c), let. e) and let f) of the Company Law)

5.1. General

Following the Spin off, OPM will increase its share capital by issuing new shares with a nominal value of RON 100 each. As the Spin off is made in the interest of OMV Petrom (in *Romanian: desprindere in interesul societatii*), the newly issued shares of OPM will be allocated exclusively to OMV Petrom.

5.2. Exchange ratio and Spin off premium

Due to the fact that the Spin off is made in the interest of OMV Petrom (in *Romanian: desprindere in interesul societatii*) and as a result the shareholders of OMV Petrom shall not receive any shares in OPM, no exchange ratio between the shares of OPM (as beneficiary company) and the shares of OMV Petrom (as the spun off company) is applicable to the Spin off.

The global valuation of the Spun off Business is based on the Spin off Financial Statements and was adjusted with the results of the fair valuation of the fixed assets of filling stations of OMV Petrom and the fair valuation of petroleum products from the filling stations, in accordance with the corrected net asset method which is one of the global valuation methods allowed under Ministry of Public Finance Order 1376/2004. The fair valuation of the fixed assets of OPM has also been taken into account in order to determine the number of shares to be issued by OPM to OMV Petrom. The summary of

OMV Petrom Marketing S.R.L.

the fixed assets valuation results for OMV Petrom and respectively OPM is presented in Schedule 3 attached hereto. The fair valuation of the petroleum products from the filling stations is based on the comparable sale prices of such products by OMV Petrom to OPM and other third parties.

The accounting value of the net contribution of the Spun off Business is of RON 993,666,838 and the global valuation of the net contribution after taking into account the fair value adjustments is of RON 1,154,343,891. The accounting net asset value of OPM is of RON 299,099,051 and the net asset value of OPM after adjustment for the fair valuation of fixed assets is of RON 304,779,795 and respectively 149 RON/share. OPM must consequently issue $1,154,343,891 / 149 = 7,755,989$ new shares to OMV Petrom (nominal value of RON 100).

Following the Spin off, a positive spin off premium of RON 378,744,991 results for the benefit of OPM, which represents the difference between the total net assets spun off to OPM (RON 1,154,343,891) and the increase in the share capital of OPM (RON 775,598,900). Out of the total spin off premium, a part will be allocated in order to take over the reserves in amount of RON 79,213,628 transferred from OMV Petrom as a result of the Spin off, respectively to record a revaluation surplus for tangible fixed assets transferred from OMV Petrom, in amount of RON 141,610,387.

In Schedule 1 are presented the Spin off balance sheet of OMV Petrom and the Spin off balance sheet of OPM as of 31 December 2009, that are prepared in accordance with legal provisions applicable for spin off operations.

5.3. OPM share capital increase

In exchange for the Spun off Business transferred to OPM, OPM shall issue to OMV Petrom 7,755,989 new shares having a nominal value of RON 100 per share. Hence OPM will increase its share capital from RON 204,780,300 by RON 775,598,900 up to RON 980,379,200.

5.4. Companies' shareholding structure

OMV Petrom S.A.

OMV Petrom Marketing S.R.L.

As a verification of the assets does not make the object of the advisory report, the Valuer has assumed a good and marketable condition of the Subject portfolio, all assets being assumed to be free of any encumbrances, easements and/or liens.

The valuation has been based upon the current market conditions; no allowance has been made either for potential extraordinary events with material effect on the project, or for possible changes in the relevant market.

Definition of Value

The present valuation is done on the basis of Market Value, as defined by the International Valuation Standards, respectively: *“the estimated amount for which a property should exchange on the date of valuation, between a willing buyer and a willing seller, in an arm’s-length transaction, after appropriate marketing, where each party has acted knowledgeable, prudently and without any compulsion”*.

Valuation Process

The valuation of the portfolio has included the following steps:

- formulate clear criteria for cluster classification;
- the portfolio has been split in clusters based on the criteria above;
- the valuation has been done using a DCF approach per cluster, the individual valuation of each station does not make the object of the present stage;
- current operational data and projections over the duration of the cash flow have been provided by the client, discussed and agreed;
- implementation of the calculation methodology for each cluster of filling stations;
- final calculation of the present Market Value for each cluster and for the entire portfolio.
