

Updated information

As communicated in our Investor News on June 30, 2022, OMV Petrom's Annual Report 2021 published on April 27, 2022 includes information corrected herein, as follows:

1. The proved oil and condensate reserves of OMV Petrom as of December 31, 2021 in Romania totaled 258.8 million barrels, as reported in the Annual Report 2021 on page 31. The equivalent in millions of tonnes of proved oil and condensate reserves is 36.0 million tonnes, not 258.8 million tonnes, as it was published in the Annual Report 2021:

Proved reserves as of December 31, 2021

	Oil and NGL			Natural gas		Total
	<i>mn t – initial</i>	<i>mn t – updated</i>	<i>mn bbl</i>	<i>bcf</i>	<i>mn boe</i>	<i>mn boe</i>
Romania	258.8	36.0	258.8	865.5	160.3	419.1
Kazakhstan	-	-	-	-	-	-
OMV Petrom Group	258.8	36.0	258.8	865.5	160.3	419.1

2. The values of the GHG Intensity indicator in the Upstream segment for the period 2018-2020 were modified, according to the Sustainability Report for 2021. Consequently, the annual variation of the indicator published in the Annual Report 2021, on page 28, is -13.0% instead of -3.4%:

“We continued to focus on improving the carbon efficiency of our operations, achieving a ~~3.4%~~ 13.0% decrease of the carbon intensity in 2021 vs. 2020.”

These corrections **do not have any impact on the company's reported financial statements**. No other corrections of other data and information in the Annual Report 2021 were made.
