Optimize traditional business

- Near field discoveries
- **Lowest yoy production decline** in seven years in 2024
- **Petrobrazil refinery:** Turnaround, new aromatic complex on track, coke drums replacement
- **Modernized filling station network** Fast payment system, digitalization
- **MyAuchan full rollout**
- **Gas sales:** strong local market share and expanded regional presence
- **Brazil power plant:** record high net electrical output

Grow regional gas

- **Neptun Deep**
 - OMV Petrom - operator since 2022; FID¹ taken in 2023
 - Development drilling started in Q1/25
 - >90% of budget awarded
 - Cost and progress on track
- **Bulgaria exploration**
 - OMV Petrom - operator since 2023
 - Transferred a 50% interest to NewMed Energy in Q1/25
 - Contracted drillship in Q2/25

Low and zero carbon

- **Strong portfolio of renewable projects**
 - Achieved a portfolio of 2.5 GW² wind and solar projects
 - Expanded regional presence in Bulgaria
- **SAF/HVO**
 - Construction ongoing; 250 kt
 - Secured >80% of feedstock

Key directions

Leading the energy transition in Romania and SE Europe

We are enabling:

- Neptun Deep - **largest gas resource** in the EU
- **One of the largest new solar and wind power portfolios** in Romania
- **Largest investment in the decarbonization** of Romanian transportation through biofuels production and **largest electric charging network**

while decarbonizing our current operations through modernization and optimization.

Our target: Net Zero operations in 2050

CCS: fundamental for decarbonizing the European economy

We built a strong portfolio...

- **Profitable mix** between M&A and organic projects
- **Valuable partners**, complementing internal resources and capabilities
- **Large scale** projects located in **high potential areas**

...with double digit IRRs:

- Project entry in **early stages** to optimize costs and grid access
- **Asset rotation** optionality
- Capitalize on low-cost financing opportunities
- Complementary **power storage projects** to ensure baseload power supply

Extending from partnerships to own investments:

- **Stepping out of the filling stations:** expanding implementation “at destination”, developing B2B business
- **M&A:** already acquired the largest network in Romania; pursuing further upside potential in the region

¹ charging points (public and private) in our operating region, including fast and ultra fast charging points, as well as wall boxes; own and in partnerships

Unique opportunities beyond renewable power, biofuels, e-mobility

CCS

Competitive advantages in CO₂ storage

- **In-depth knowledge** of geological structures
- Access to on- & offshore long-term **storage potential**
- **Capabilities developed** to position as early mover

Fundamental prerequisites

- supportive regulatory framework
- projects economics
- funding schemes
- market demand

Other high potential technologies

- **Potential for strong demand** for lower and zero-carbon H₂
- Exploring **integrated H₂ player position**

- **Natural complement** to RES production
- **Integration** for enhanced value and consolidated market position

- **Opportunity to enhance renewable products portfolio** and cash generation, while **leveraging E&P capabilities**

- **Investigating opportunities** on the biogas value chain to support transition to low carbon

Increase our low and zero carbon businesses

Investing to 2030 in projects with double-digit returns

¹ Projects selection and prioritization will be based on risk and return assessments, including regulatory developments, that might end up in different allocation between technologies, within the ~EUR 3.7 bn CAPEX plan; ² As of end-2024
