Disclaimer

This presentation does not, and is not intended to, constitute or form part of, and should not be construed as, constituting or forming part of, any actual offer to sell or issue, or any solicitation of any offer to purchase or subscribe for, any shares issued by the Company or any of its subsidiaries in any jurisdiction or any inducement to enter into investment activity; nor shall this document or any part of it, or the fact of it being made available, form the basis of, or be relied on in any way whatsoever. No part of this presentation, nor the fact of its distribution, shall form part of or be relied on in connection with any contract or investment decision relating thereto; nor does it constitute a recommendation regarding the securities issued by the Company. The information and opinions contained in this presentation and any other information discussed in this presentation are provided as at the date of this presentation, have not been independently verified and may be subject to updating, revision, amendment or change without notice. Where this presentation quotes any information or statistics from any external source, it should not be interpreted that the Company has adopted or endorsed such information or statistics as being accurate.

No reliance may be placed for any purpose whatsoever on the information contained in this presentation, or any other material discussed verbally. No representation or warranty, express or implied, is given as to the accuracy, fairness or correctness of the information or the opinions contained in this document or on its completeness and no liability is accepted for any such information, for any loss howsoever arising, directly or indirectly, from any use of this presentation or any of its content or otherwise arising in connection therewith.

This presentation may contain forward-looking statements. These statements reflect the Company's current knowledge and its expectations and projections about future events and may be identified by the context of such statements or words such as "anticipate," "believe", "estimate", "expect", "intend", "plan", "project", "target", "may", "will", "would", "could" or "should" or similar terminology.

None of the future projections, expectations, estimates or prospects in this presentation, including (without being limited to) net zero emission from operations target, EBIT target, dividend, production evolution, price assumptions in base and downside scenarios should be taken as forecasts or promises nor should they be taken as implying any indication, assurance or guarantee that the assumptions on which such future projections, expectations, estimates or prospects have been prepared or the information and statements contained herein are accurate or complete. By their nature, forward-looking statements are subject to a number of risks and uncertainties, many of which are beyond the Company's control, including (without being limited to): (a) price fluctuations and changes in demand for Company's products; (b) currency fluctuations; (c) drilling and production results; (d) reserves estimates; (e) loss of market share and industry competition; (f) environmental risks; (g) changes in legislative, fiscal and regulatory framework; (h) economic and financial market conditions in countries of operation; (i) political risks; (j) risks associated with the impact of pandemics, such as the COVID-19 (coronavirus); (k) effects of the Russia-Ukraine conflict; and (l) changes in trading conditions, that could cause the Company's actual results and performance to differ materially from any expected future results or performance expressed or implied by any forward-looking statements. As a result of these risks, uncertainties and assumptions, you should in particular not place reliance on these forward-looking statements as a prediction of actual results or otherwise. This presentation does not purport to contain all information that may be necessary in respect of the Company or its shares and in any event each person receiving this presentation needs to make an independent assessment.

The Company undertakes no obligation publicly to release the results of any revisions to any forward-looking statements in this presentation that may occur due to any change in its expectations or to reflect events or circumstances after the date of this presentation.

This presentation and its contents are proprietary to the Company and neither this document nor any part of it may be reproduced or redistributed to any other person.

All figures throughout this presentation refer to OMV Petrom Group (hereinafter also referred to as "the Group"), unless otherwise stated; figures are rounded, and they may not add up. The financials represent OMV Petrom Group's consolidated results prepared according to IFRS. The financials are expressed in RON mn and rounded to closest integer value, so minor differences may result upon reconciliation. In this presentation, Clean CCS EBIT refers to Clean CCS Operating Result.

Sustainable growth in energy, value and dividends

¹ in execution phase as of April 2026; ² weight in total hydrocarbon production of OMV Petrom in 2030; ³ in 2030; ⁴ distributions include base and special dividends; ⁵ cumulated by 2030; ⁶ in low and zero carbon projects out of ~EUR 11 bn total investments for 2022-2030, adjusted downwards from ~35% as announced in February 2026. More details to be provided during the CMD planned for H2/26.

Highly competitive dividends

Dividend Policy

- > **Paying progressive base dividend**, in line with financial performance and investment needs, considering the long-term financial health of the Company.
- > **Paying discretionary special dividends**, potentially distributed in favorable market environment, provided that our investment plans are funded.

Strong commitment by 2030

Base dividend

- > **5-10%**
increase p.a.

Total dividends (base and special)

- > **~40-70%**
OCF¹ yearly range

Transforming for a lower carbon future

Building a diversified, integrated energy transition business

OMV Petrom portfolio 2030

■ Low and zero carbon
 ■ Regional gas
 ■ Traditional business

Clean CCS EBIT %

>EUR 1.5 bn

CAPEX %

~EUR 11 bn

¹ Data according to Strategy 2030 reconfirmed in 2024. As announced in February 2026, the total gross investments of ~EUR 11 bn for 2022-2030 are maintained, with the share of Low and zero carbon changing to ~25% (from ~35%), while increasing Traditional business and Regional gas growth investments. More details to be provided during the CMD planned for H2/26.

Strategy 2030 update: robust opportunity portfolio

2030 strategic projections revised¹:

- **Reallocation of CAPEX** from still maturing new technologies to E&P opportunities:
 - EUR ~1 bn reallocated; LCB CAPEX weight to decrease to 25% from 35%
 - CAPEX 2022-2030 maintained at EUR ~11 bn
- **E&P production** target increased:
 - 2030: ~170 kboe/d¹ (prev.: >160 kboe/d)
 - enabled by agreed principles for 15-year production licenses extension and extension of exploration licenses
- **Adjusting carbon targets:**
 - Scope 1-3 carbon intensity of energy supply^{2,3}: -10% (prev.: -20%), in line with market demand

¹ Vs. Capital Markets Day 2024; ² Target includes Category 11 for Scope 3 emissions: Use of sold products for energy supply; ³ Target refers to Carbon Intensity of Energy Supply for 2030 in gCO₂eq/MJ

Delivering on our Strategy 2030

Strategy 2030 proven resilient against backdrop of significantly volatile macro environment

Underway with Neptun Deep development – onstream in 2027 with growth out to 2030+

Double digit returns on investments in low and zero carbon businesses with **strong project pipeline**

Strong financial framework and **peer leading dividends**

Experienced management team with proven ability to deliver the strategic projects

Delivering on our Strategy 2030

Black Sea

Neptun Deep

- Progressing as planned
- 4 wells drilled in Pelican South, 6 wells being drilled in Domino
- Continued gas marketing

E&A

- **Han Asparuh block:** drilling program finalized, no significant gas volumes encountered; **Han Tervel block:** entered the license¹
- License extension in Romania
- Preparing for the next deep water well in the Romanian Black Sea

Low and zero carbon

Renewable power

- Acquisition of 50% interest in Gabare project (400 MW, PV) (Bulgaria)
- >1,100 MW² in execution, ~70 MW² in production at end-Q1/26

Biofuels & E-mobility

- Construction of the SAF/HVO unit progressing as planned
- Secured feedstock for SAF/HVO production
- E-mobility: ~1,490 charging points installed at end-Q1/26

Traditional business

E&P

- Managing production decline
- RRR 2025: 140%
- E&A: onshore licenses extension
- Agreed principles for 15-year production licenses extension

R&M

- New aromatic complex finalized
- Throughput per FS in 2025: 5.9 mn liters

G&P

- Consolidated regional footprint
- Increasing gas sales volumes

Attractive dividends

- Yield³ of total dividend paid in 2025 of 9.1%
- Base DPS for 2025: RON 0.0466, up 5% yoy
- Total dividend (base + special): RON 0.0578/share, 40% of 2025 OCF, payable starting June 8, 2026

¹ OMV Petrom 25%, Shell 42% (operator), TPAO 33%; completion of the transaction pending approval from the Bulgarian Government; ² Including partnerships; ³ Share price on December 31, 2024

Enabling our transformation

Digitalization with impact

Leveraging digitalization to accelerate transformation

Aiming for highest level of compliance with the new BVB Code

Compliance with the BVB Code

- **Previous BVB Code**
 - applicable for 2016-2024
 - in 2024, OMV Petrom fulfilled 32 out of the 34 recommendations of the BVB Code¹
- **New BVB Code**
 - applicable starting Jan 1, 2025
 - 2025 Annual reporting for all 77 recommendations; high level of compliance
 - incorporating the feedback received from investors

Implementation of the new BVB Code – highlights –

- **Updated remuneration policy**
 - applicable from 2026 onwards
 - all criteria to refer exclusively to OMV Petrom's performance and LTIP payment to be made in OMV Petrom shares
 - Clawback and Malus clauses in line with market practice (for both Annual Bonus and LTIP)
- **Updated Internal Rules for the SB**
 - visibility for SB approval thresholds
 - new responsibilities for SB
 - internal audit reporting to SB via AC
- **Updated Terms of References for AC and NRC**
 - New responsibilities for AC and NRC
- **Other new or updated policies** (e.g. EB & SB Profiles and Nomination Policies, RPT Policy, Forecast Policy, Policy on Internal Control Framework & System, Risk Management Policy)

Key directions

Decarbonize current operations

Expand lower carbon gas business

Pursue new low and zero carbon business opportunities

Leading the energy transition in Romania and SE Europe

We are enabling:

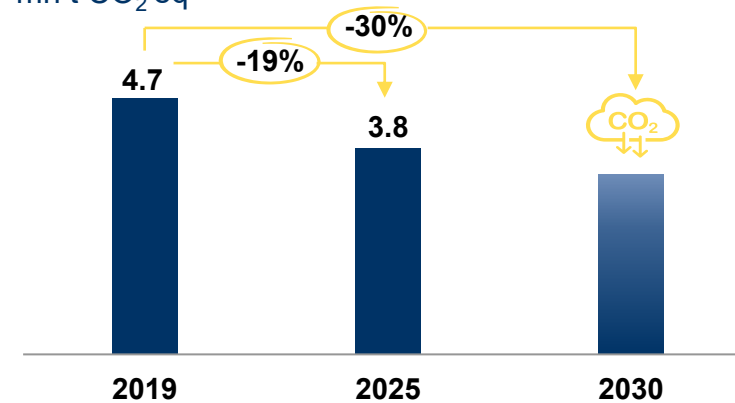

- Neptun Deep - **largest gas resource** in the EU
- **One of the largest new solar and wind power portfolios** in Romania
- **Largest investment in the decarbonization** of Romanian transportation through biofuels production and **largest electric charging network**

while decarbonizing our current operations through modernization and optimization.

Our ambition: Net Zero operations in 2050

CCS: fundamental for decarbonizing the European economy

Scope 1 – 2 GHG emissions
mn t CO₂ eq

Scope 1 – 3 ¹ Carbon Intensity of Energy Supply
gCO₂eq/MJ

¹ includes Category 11 for Scope 3 emissions: Use of sold products for energy supply

Increased and accelerated plans in renewable power

One of the largest new solar and wind power portfolio in Romania

Key figures by 2030

- >**2.5 GW**
target capacity installed¹
60% solar; 40% wind
- >**4.7 TWh**
yearly electrical output²
- > **~EUR 3 bn**
full projects CAPEX
~EUR 1 bn
OMV Petrom CAPEX³
- > **~35%**
of households demand⁴

We built a strong portfolio...

- **Profitable mix** between M&A and organic projects
- **Valuable partners**, complementing internal resources and capabilities
- **Large scale** projects located in **high potential areas**

...with double digit IRRs:

- Project entry in **early stages** to optimize costs and grid access
- **Asset rotation** optionality
- Capitalize on low-cost financing opportunities
- Complementary **power storage projects** to ensure baseload power supply

Increased targets enabled by partnerships and CAPEX capacity (GW)¹

Main projects

- CE Oltenia, 550 MW PV (50% interest)⁵
- Teleorman, 710 MW PV (100% interest)
- Renovatio, 950 MW wind, 180 MW PV (50% interest)⁶
- Isalnita, 89 MW PV (100% interest)
- Gabare, 400 MW PV (50% interest)^{6, 7}

¹ by 2030, including partnerships; previous target: >1 GW. The new capacity net to OMV Petrom >1.3 GW; ² including partnerships; net to OMV Petrom: >2.4 TWh, by 2030; ³ OMV Petrom CAPEX before subsidies; ⁴ calculated based on the gross production, which includes partnerships; ⁵ Joint operation; ⁶ Joint venture; ⁷ Closed in 2025; ⁸ Final investment decision by end-2025

Becoming the first major producer of renewable fuels in SE Europe

- > FID taken for: **250 kta SAF/HVO¹** and **~8 kta green H₂**
- > **Increasing biofuels demand** in our region; access to **EU funds**
- > **>80% of feedstock** secured for the first 8 years; of which ~50% waste-based
- > Green H₂ production to **meet RFNBO² targets** and **secure input** for SAF/HVO unit

Our new targets by 2030

Biofuels

kta production

Green H₂

kta production (MW capacity)

¹ SAF = sustainable aviation fuel; HVO = hydrotreated vegetable oil (renewable diesel); ² RFNBO = Renewable Fuels from Non-Biological Origin; ³ Flexible unit with base case mix: 90kt SAF, 130kt HVO, 30kt bio-naphtha and bio-LPG; ⁴ Subject to equipment delivery time

Consolidating our position as 1st choice mobility provider in Romania

- > **~5,000 CPs¹**
Increased 2030 target
- > Capture **early mover advantage** and **increasing demand**
- > Continue to access **EU funds**
- > **Significant integration potential** of e-mobility with green energy production

Our increased target No. of CPs

Extending from partnerships to own investments:

- **Stepping out of the filling stations:** expanding implementation “at destination”, developing B2B business
- **M&A:** already acquired the largest network in Romania; pursuing further upside potential in the region

¹ charging points (public and private) in our operating region, including fast and ultra fast charging points, as well as wall boxes; own and in partnerships

Unique opportunities beyond renewable power, biofuels, e-mobility

CCS

Competitive advantages in CO₂ storage

- **In-depth knowledge** of geological structures
- Access to on- & offshore long-term **storage potential**
- **Capabilities developed** to position as early mover

Fundamental prerequisites

- supportive regulatory framework
- projects economics
- funding schemes
- market demand

Other high potential technologies

- **Potential for strong demand** for lower and zero-carbon H₂
- Exploring **integrated H₂ player position**

- **Natural complement** to RES production
- **Integration** for enhanced value and consolidated market position

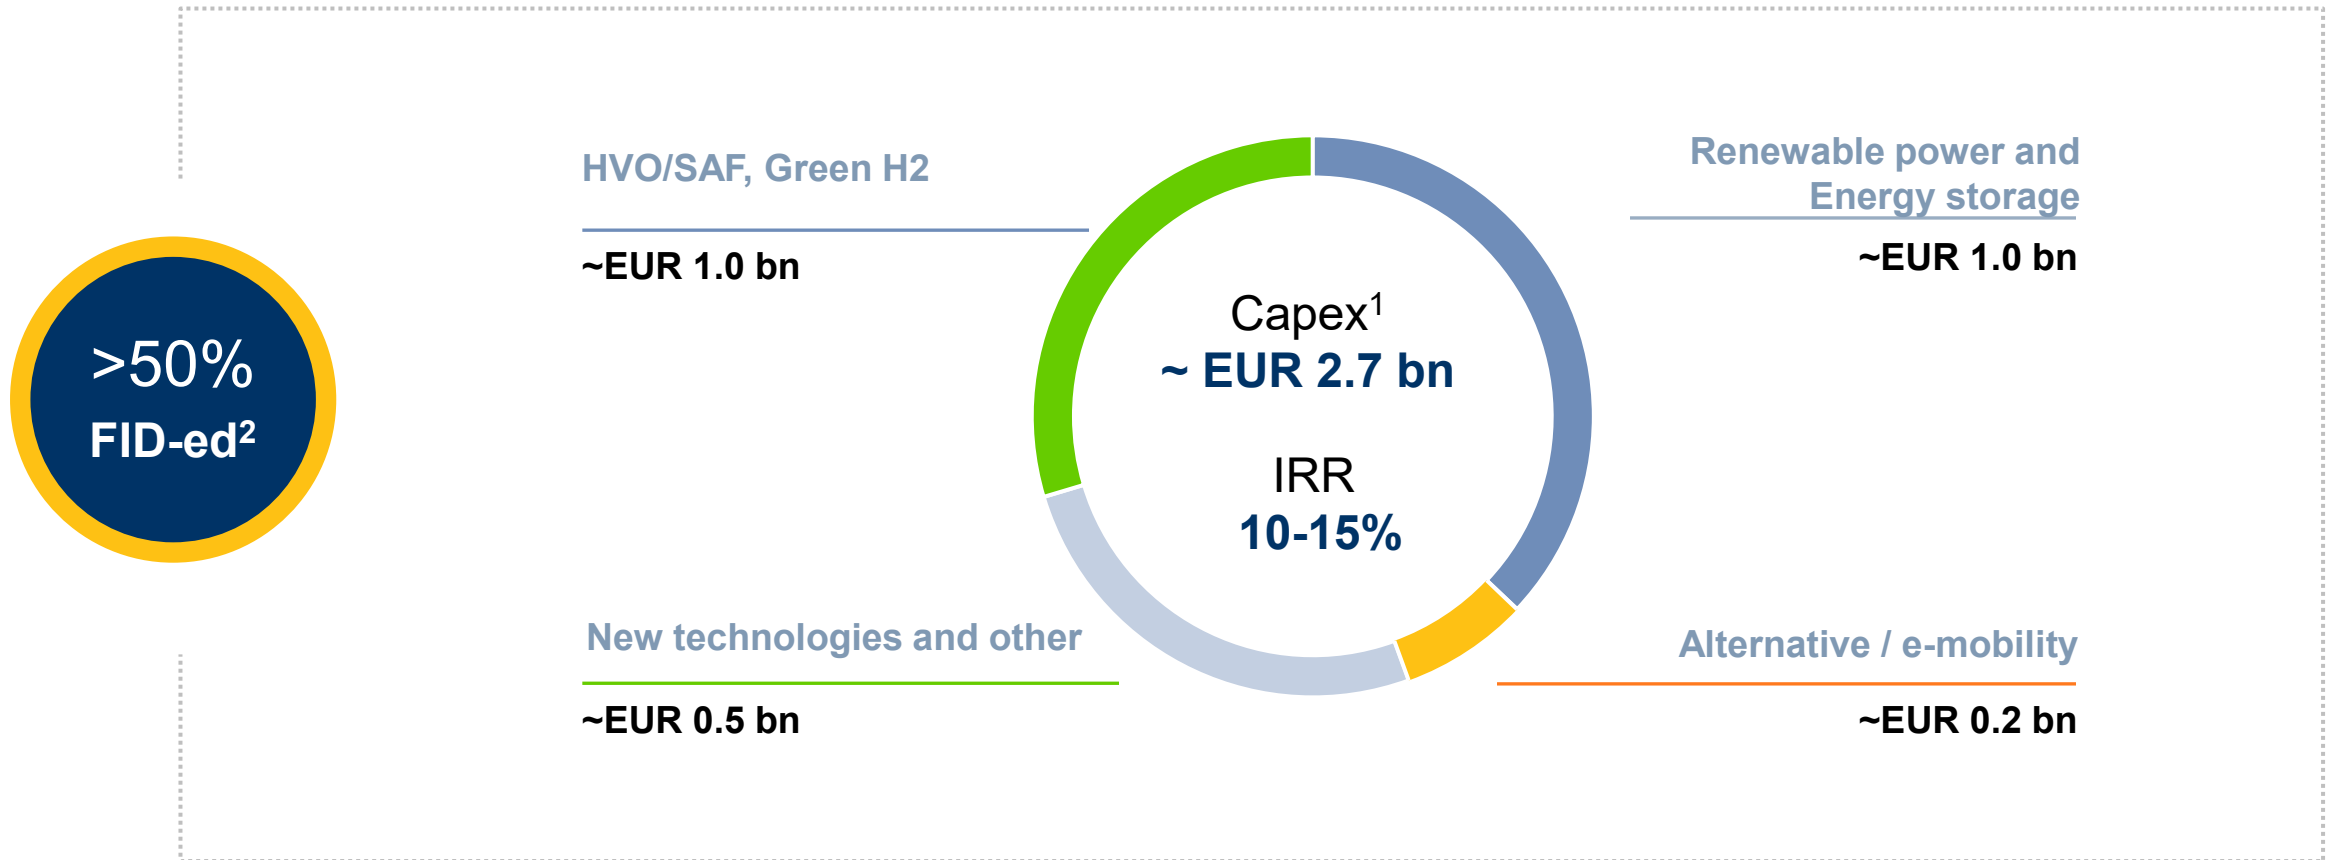

- **Opportunity to enhance renewable products portfolio** and cash generation, while **leveraging E&P capabilities**

- **Investigating opportunities** on the biogas value chain to support transition to low carbon

Increase our low and zero carbon businesses

Investing to 2030 in projects with double-digit returns

¹ Projects selection and prioritization will be based on risk and return assessments, including regulatory developments, that might end up in different allocation between technologies, within the ~EUR 2.7 bn CAPEX plan; ² As of end-2025

A photograph of a person's hands holding a small green seedling in a field at sunset. The sun is low on the horizon, creating a warm, golden glow. The background is a blurred field of dry grass and trees.

Black Sea – a unique opportunity for OMV Petrom and the region

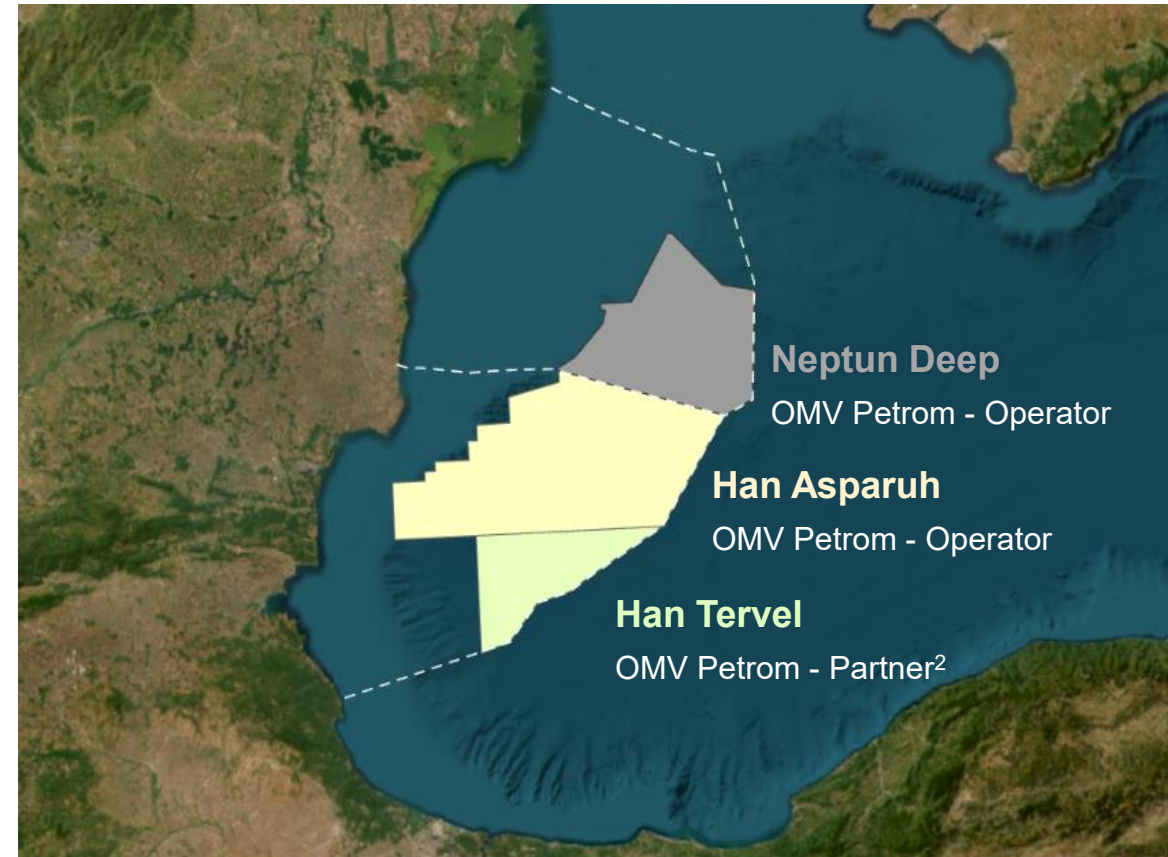

Black Sea – a stepping-stone to greater energy security in South-East Europe

OMV Petrom – Operator of two deep offshore neighboring blocks, leveraging strong experience

- **Neptun Deep:** a transformational project in development phase, with robust economics and well on track to deliver growth; first gas expected in 2027; OMV Petrom (operator, 50%), Romgaz (50%)
- **Han Asparuh:** exploration drilling finalized, no significant gas volumes encountered; evaluation ongoing to decide next steps; OMV Petrom (operator, 45%), NewMed (45%), BEH (10%)¹
- **Han Tervel:** entered the license; OMV Petrom (25%), Shell (operator, 42%), TPAO (33%)²

¹ State-owned Bulgarian Energy Holding (BEH); ² Completion of the transaction pending approval from the Bulgarian Government

A game-changer project – set for success

Strong team capabilities

- **International team with extensive experience** in delivering global deepwater mega projects
- **Extensive knowledge of Neptun Deep field** – 10+ years as non operator, ~4 years as operator
- **OMV Petrom** – operator in the Black Sea for more than 40 years
- **Leverage OMV Group’s expertise** in delivering major capital projects

Robust project fundamentals

Project view (100% interest)

- OMV Petrom **50%, Operator;** Romgaz, 50%
- Estimated recoverable volumes: **~100 bcm or 700 mn boe**
- Production start: **2027**
- Production at plateau: **~140 kboe/d**
- Development CAPEX: **up to EUR 4 bn**
- Production cost¹: **~3 USD/boe**
- IRR² LoF: **>12%**

Proven development concept

- 1 Domino:** to produce via two subsea drill centers with six wells
- 2 Pelican:** to produce via one subsea drill center with four wells
- 3 Shallow water production platform**
- 4 Gas production pipeline**
- 5 Natural Gas Metering Station onshore (NGMS)**

Novel technology

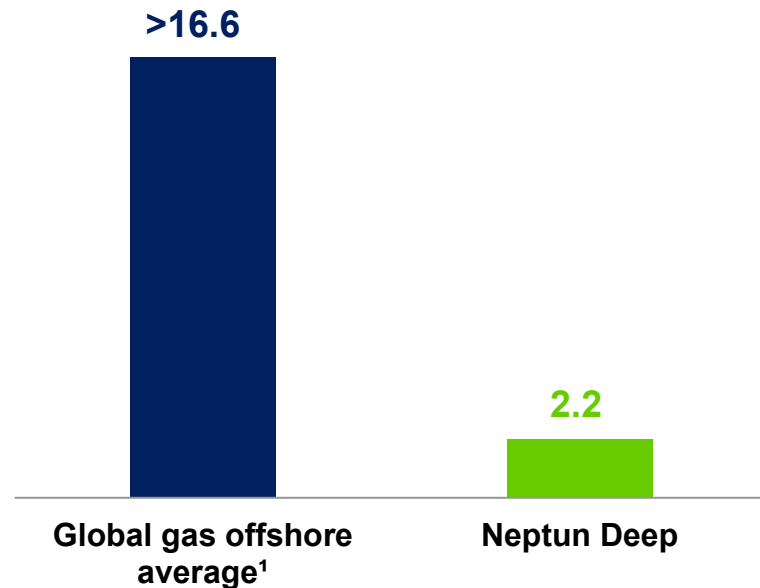

- **Fully remotely operated production platform (unstaffed)**
- **Digital twins**
- Purpose built, **state of the art, dedicated operational multipurpose support vessel (OSV/MSV)**

¹ Average for the life of field, does not include royalties, supplemental taxes, depreciation; ² OMV Petrom’s perspective; life of field

Very low carbon intensity operations by industry standards

Direct GHG emissions

per unit of hydrocarbon production
kg CO₂ per boe

Neptun Deep will contribute to our 2030 targets for **Methane Intensity**² and **Scope 1-3 Carbon Intensity of Energy supply**²

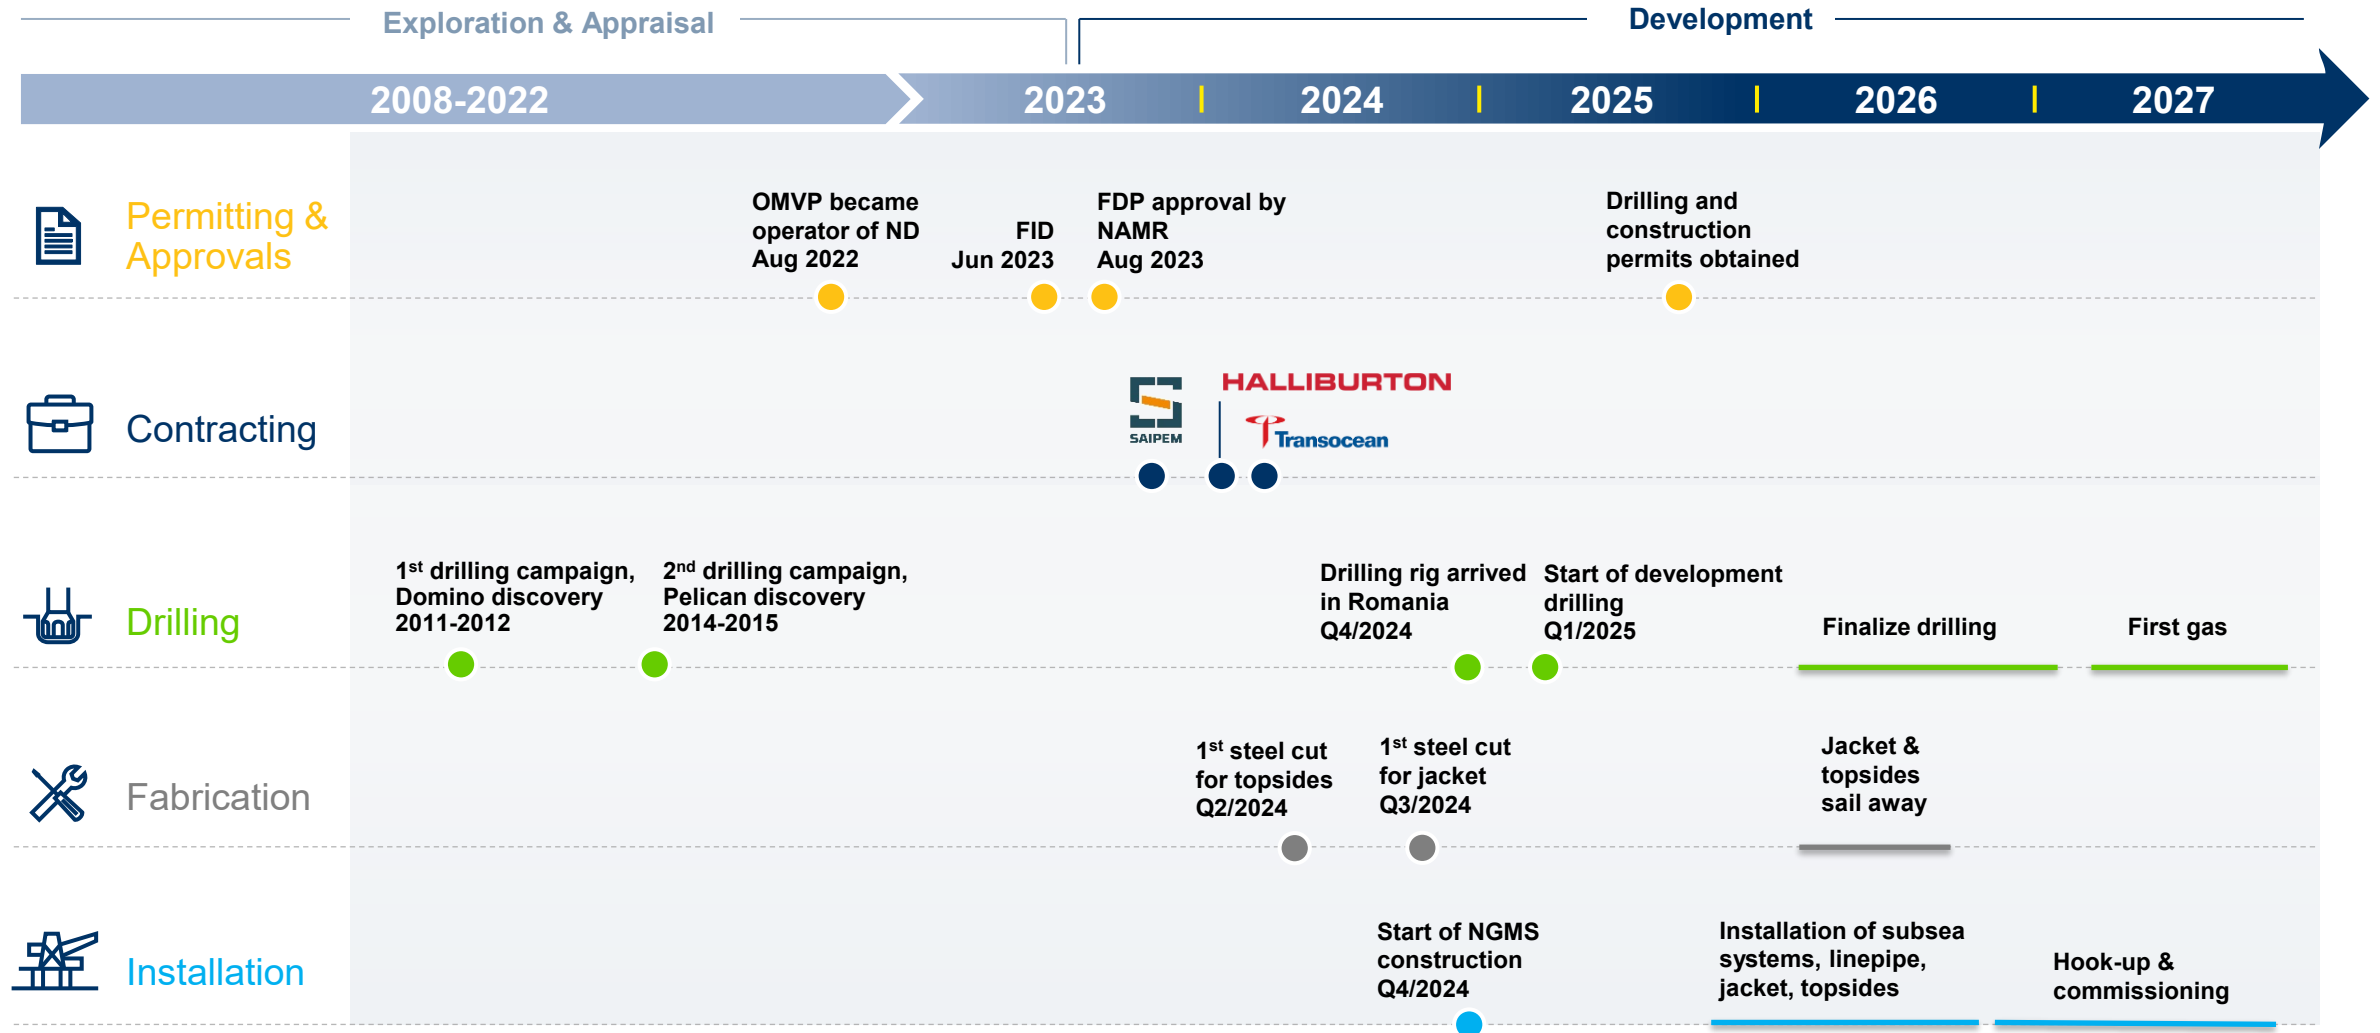

Depletion Driven Concept – The **natural pressure** from the reservoir is used to transport the gas to shore, eliminating the need for compression

Pelican and Domino are Biogenic gas reservoirs (99.5% methane) with no contaminants, oil content or liquid hydrocarbons

¹ IOGP Environmental performance indicators issued in January 2026 and reflecting IOGP Member Companies' performance; ² vs 2019

On track to deliver first gas in 2027, on budget

A photograph of a person's hands holding a small green seedling in a field at sunset. The sun is low on the horizon, creating a warm, golden glow. The background is a blurred field of dry grass and soil.

Integrated E&P assets: maximize value

CAPEX¹
~ EUR 500
mn / year

IRR
>12%

Production
broadly
flat²

Value over volume and strict cost management:

- Maximize economic recovery
- Focusing on near field opportunities
- Streamline footprint and reduce complexity
- Operating cash flow break-even for our oil and gas portfolio ~30 USD/boe in 2030³

	2025	2030
Workovers p.a.	542	~500 (>400 before)
New wells p.a.	31⁴	30 - 50 (prev.~ 50)
Facilities and wells modernized and automated	88%	>95% (unchanged)
E&P methane intensity	0.2%	<0.2% (unchanged)

¹ 2024-2030, average, excluding Neptun Deep; ² 2024-2030 average annual trend in traditional hydrocarbon production, before divestments and excluding Neptun Deep volumes;

³ Considering traditional oil and gas production, excluding Neptun Deep volumes; ⁴ Excluding the wells drilled within production enhancement contracts (one well in 2025) and the Neptun Deep development wells drilled in 2025

E&P business highly cash generative

Transforming while delivering strong cash flows

Hydrocarbon production¹
kboe/d

Production cost
USD/boe

Operating cash flow
USD/boe

¹ 2030 target updated in February 2026 to ~170 kboe/d (before potential divestments estimated at 10-15 kboe/d by 2030)

High performing refinery with above average utilization

Production
mn t/year

	2025	2030 <i>(targets unchanged)</i>
Refinery utilization ³	93%	>95% ⁴
Bottom of the barrel upgrade ⁵ kt/year	—	~200

¹ Including aromatics; ² Comprises other products such as: hydrotreated gasoline, heavy gasoline fraction, etc.; ³ Refers to crude distillation unit; in 2025, there was a 20-day planned shutdown; ⁴ Average for 2024-2030, excluding years with planned turnaround (i.e. 2027); ⁵ Additional non-fuel products, like bitumen, carbon black or calcined coke

Our Retail proposition

Dual brand strategy to further drive value increase

	2025	2030 <i>(targets unchanged)</i>
Profitability per filling station ^{1,3}	+21%	+20%
Non-fuel business margin¹	+76%	+100%
Throughput per filling station ²	+21% 5.9 mn l	+20% ~6 mn l
Number of filling stations	780	~800

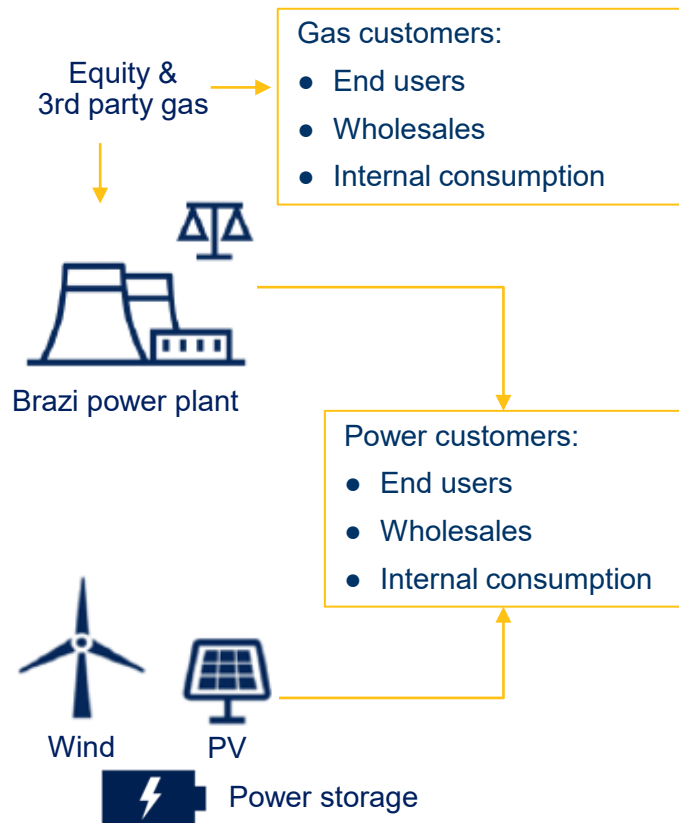

Customers' first choice

¹ vs 2020, data refer to OMV Petrom operating region which includes Romania, Bulgaria, Moldova and Serbia; ² vs 2020, in Romania; ³ Excluding EV contribution

Redesigned gas and power business capturing market trends

Leading integrated gas and power supplier

Maximize returns from integrated optimization of our gas and power portfolios

- Strong supply portfolio with the ramp-up from Neptun Deep gas volumes
- Profitability driven by optimization of asset portfolio and multiple sales channels

Strong market positioning also on neighbouring markets

- Market access and trading already existing in the region
- B2B sales portfolio to be further developed

	2025	2030
Total gas sales TWh	48	>70 (prev. 60)
Net electrical output¹ TWh/year	4.7	>6 (unchanged)
Green power sales % in total	-	~30 (unchanged)

¹ Brazi power plant and renewable power assets' output, average for 2024-2030, net to OMV Petrom, including share in partnerships

¹ CAPEX cumulated for 2022-2030; ² Single year rate

Company's transformation supports higher shareholder returns

1 Organic CAPEX

- Further invest in the **profitable traditional business**
- Transformation for **sustainable growth** and **lower carbon future**
- **Double digit returns** to enable profitable growth

2 Progressive base dividends

- Committed to a **competitive shareholder** return by paying a progressive base dividend
- **5% - 10% yoy increase of base dividend** throughout strategic cycle

3 Inorganic CAPEX

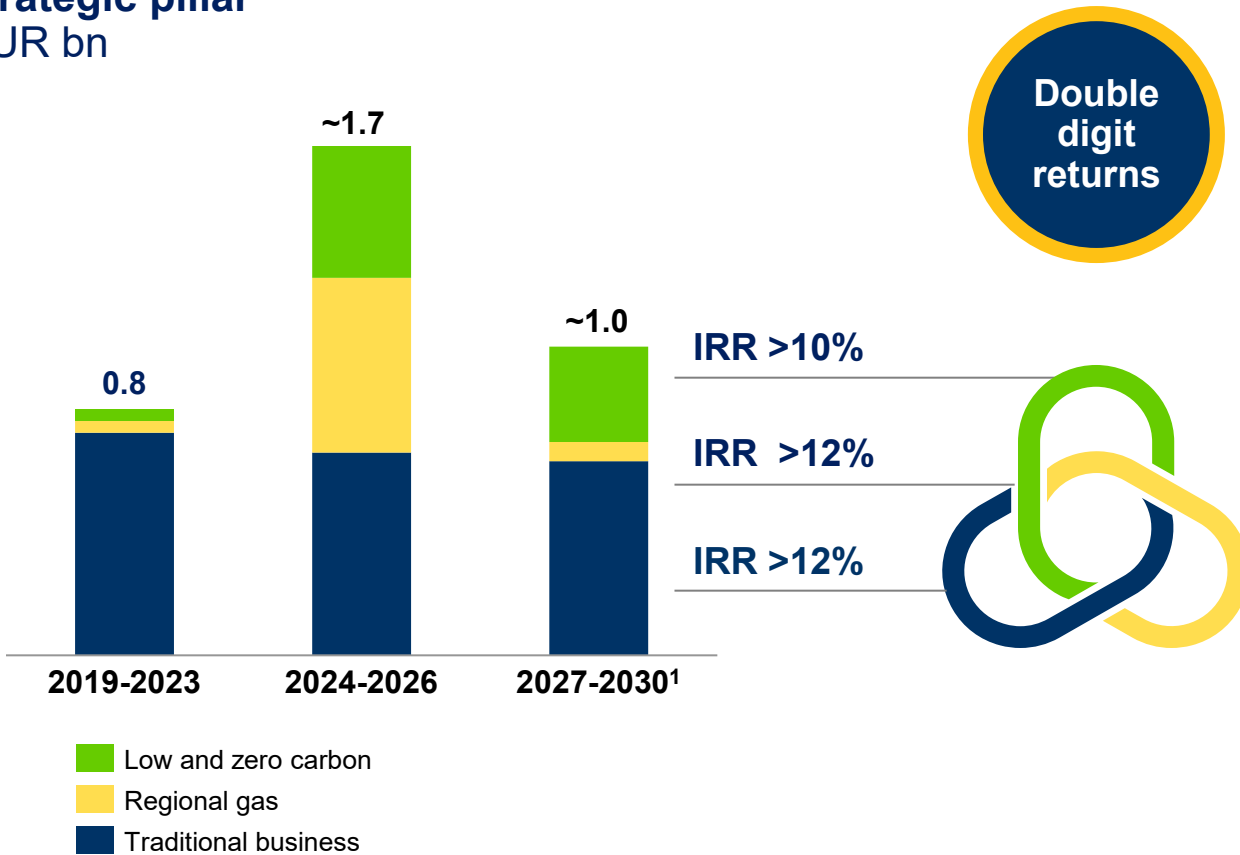

- Selective **M&A transactions** to help accelerate energy transition
- Largely allocated to **transformational projects** in the low and zero carbon businesses

4 Special dividends

- **Special dividends** potentially distributed in favorable market environment
- Together with base dividend, **total dividend will account for ~50% of OCF** on average by 2030

Rigorous capital discipline underpins strategy

Average annual CAPEX per strategic pillar
EUR bn

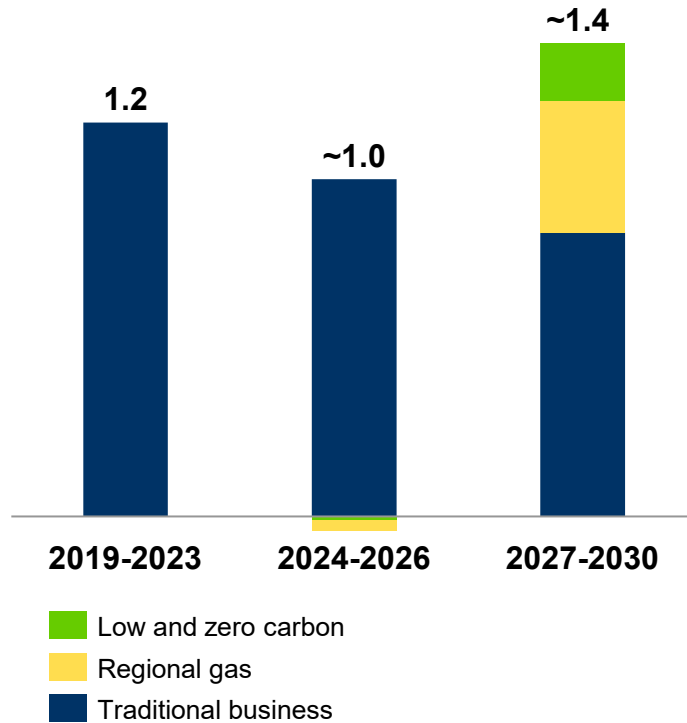

Average annual CAPEX per business segment
%

¹ Data according to Strategy 2030 reconfirmed in 2024. As announced in February 2026, the total gross investments of ~EUR 11 bn for 2022-2030 are maintained, with the share of Low and zero carbon changing to ~25% (from ~35%), while increasing Traditional business and Regional gas growth investments. More details to be provided during the CMD planned for H2/26.

Delivering strong financial performance across the business

¹ Adjusted for solidarity contribution recorded in 2023

Resilience under downside-price scenario¹

Still strong financial position

Clean CCS EBIT EUR bn

Under downside price scenario:

- Commitment to pay progressive base dividends maintained
- CAPEX plans largely unchanged by 2030
- Gearing ratio below 20% throughout the period

¹ Downside-price assumptions (2024-2030): Brent oil: ~40-60 USD/bbl, gas hub prices: 17-20 EUR/MWh and refining margin: 6-7 USD/bbl

A photograph of two hands, one from a lighter-skinned person and one from a darker-skinned person, gently holding a small green seedling in a field. The background is a soft-focus landscape with a bright sun setting or rising, creating a warm, golden glow. The hands are positioned on either side of the seedling, which is planted in a small mound of soil.

Strong performance supported by our integrated business

Q1/26 highlights

- Good hydrocarbon production performance: **gas production up 2% yoy**
- Refinery **utilization** rate: 98%; **refined product sales**: +11% yoy
- **Highest gas sales** since Q1/20
- **2nd highest power production** since start of operations in Brazi power plant

TRIR³: 0.59

HSSE

Strategic focus continued

- **Neptun Deep** project: progressing according to plan; development drilling in Domino field and construction works continued
- **Bulgaria offshore: Han Asparuh** block: drilling program finalized, no significant gas volumes encountered; **Han Tervel** block: entered the license (Shell, TPAO)¹
- **Renewable power**: ~300 MW of wind projects entered development phase, leading to >1,100 MW² of PV and wind in execution and ~70 MW² in production
- **Biofuels**: construction of the SAF/HVO plant progressing as planned; first module for the green H₂ plant delivered
- **Dividend** of RON 0.0578/share to be paid starting June

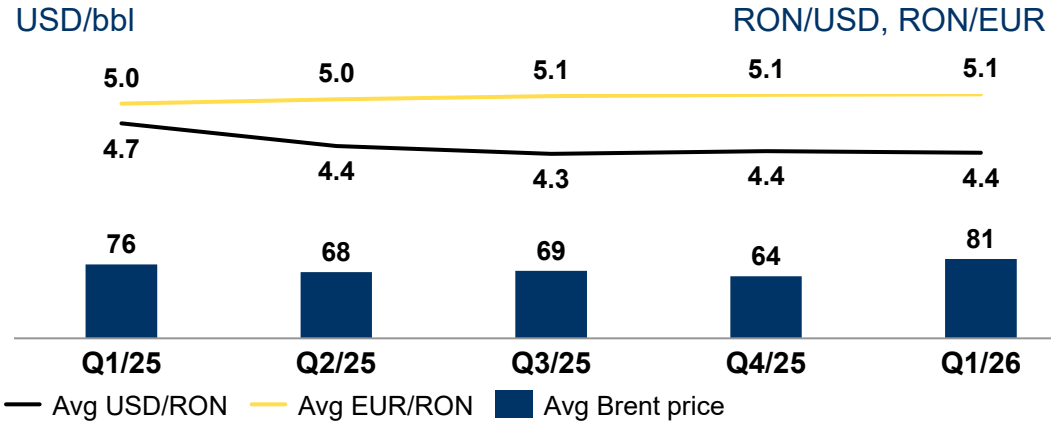

GHG intensity⁴: -19%

¹ OMV Petrom 25%, Shell 42% (operator), TPAO 33%; completion of the transaction pending customary approval from the Bulgarian Government; ² Including partnerships; ³ Total Recordable Injury Rate, April 2025 – March 2026; ⁴ Greenhouse gases intensity 2025 vs. 2019

Newly introduced measures in 2026

Applicable regulations

- **New measures** in the context of crisis situation on the oil and fuels markets, applicable for Q2/26:
 - limiting the R&M margins for gasoline and diesel
 - solidarity contribution in E&P
 - reduced excise for standard diesel fuel
- **Gas sector remains regulated** until end Q1/27 with some reduced scope (households and heat producers for households)
- **Construction tax:** introduced starting 2025 at 0.5% of the net value of constructions; to be eliminated as of January 1, 2027
- **Oil & gas revenues tax:** at 0.5%, extended until end-2026; to be eliminated as of January 1, 2027
- **Power sector deregulated** since July 1st 2025, with state support provided to vulnerable consumers

Highly regulated gas sales portfolio

¹ Includes sales quantities subject to GEO 27/2022 and GEO 119/2022 (households, heat producers for households, cost plus, trading, supplier of last resort)

Divisional performance

E&P – impacted by lower oil volumes and realized gas prices

Main drivers for Q1/26 results

- Lower realized gas price
- Lower oil and NGL sales -8%
- Negative FX effect
- Higher realized crude price
- Lower E&P taxation
- Higher gas sales volumes

Outlook 2026

- **Brent oil price:** USD 85-95/bbl (prev.: USD ~65/bbl; 2025: USD 69/bbl)
- **Production²:** >100 kboe/d (2025: 104.5 kboe/d)
- **Production cost:** similar to 2025 (prev.: USD >16/boe; 2025: USD 17.8/boe)
- **CAPEX:** RON ~5.6 bn (2025: RON 5.6 bn)

¹ Market effects defined as oil and gas prices, foreign exchange impact on revenues, price effect on royalties (including gas over-taxation); ² Considering no divestments

Divisional performance

R&M – refining result partly offset by lower marketing margins

Main drivers for Q1/26 results

- Refining margin +74%
- Strong refinery utilization rate: 98%
- Total refined product sales, +11%
- Lower sales channels margin
- Slightly lower non-fuel business contribution

Outlook 2026

- **Refining margin:** USD >10/bbl (prev.: USD ~9/bbl; 2025: USD 12.4/bbl)
- **Refinery utilization:** >95% (2025: 93%)
- **Retail fuels demand in Romania:** stable yoy
- **Total refined product sales:** higher yoy
- **Retail fuel sales:** stable yoy

Clean Operational Result

%

Retail sales volumes

mn t

¹ Market effects based on refining indicator margin

G&P – strong performance in both business lines

Main drivers for Q1/26 results

- Deregulation of the power market
- Higher power production, +32%
- Higher margins on power bought from 3rd parties
- Strong results of power balancing and ancillary services
- Higher gas sales volumes, +23%
- Higher gas margins

Outlook 2026

- **Demand for gas in Romania:** stable yoy (prev.: slightly higher yoy)
- **Demand for power in Romania:** stable yoy
- **Total gas sales volumes:** lower yoy
- **Net electrical output:** higher yoy

Clean CCS Operating Results

Resilient results in all business segments

E&P RON mn

R&M RON mn

G&P RON mn

- Realized crude price -16%
- Hydrocarbon sales -5%
- Unfavourable FX
- Higher royalties and gas over-taxation
- Higher production costs
- Higher realized gas price
- Net positive impact from litigations
- Lower depreciation and exploration expenses

- Refining margins +35%
- Retail sales +1%
- Higher costs including depreciation
- Lower refinery utilization
- Lower refined product sales

- Higher gas sales volumes
- Higher electricity sales volumes
- Good margins on electricity from 3rd parties and on balancing and ancillary services
- Power market regulated until June 2025
- Lower net electrical output

¹ Market effects defined as oil and gas prices, foreign exchange impact on revenues, price effect on royalties (including gas over-taxation); ² Market effects based on refining indicator margin

Operational KPIs

Exploration & Production

Production cost USD/boe

Key drivers 2025 vs. 2024

- Lower production available for sale
- Unfavorable FX
- New construction tax

Hydrocarbon production kboe/d

- Natural decline
- Planned maintenance activities

- Contribution from workovers and new wells

Oil and NGL Gas

Operational KPIs

Refining & Marketing

OMV Petrom Indicator refining margin USD/bbl

Key drivers 2025 vs. 2024

- Higher crack spreads for middle distillates

Retail sales volumes (mn t) and Retail Operating Result per filling station (trend)

- Retail sales +1%
- Slightly improved non-fuel business contribution
- Retail operating result per filling station¹ +4.5% CAGR 2021-2025

- Refined product sales -5% (refinery planned shutdown in 2025)

■ Retail sales volumes — Retail Operating Result per filling station

¹ Retail including Cards business

Operational KPIs

Gas & Power

Gas sales volumes TWh

Key drivers 2025 vs. 2024

- Larger volumes to wholesales and end users
- Higher 3rd party acquisitions

- Higher obligation for the gas regulated market (10.9 TWh)

Brazi net electrical output TWh

- MACEE¹ no longer applicable in 2025 (in place between Jan 1, 2023 and Dec 31, 2024)
- Higher sales prices and volumes of electricity

- Power market regulated until June 2025, leading to lower production, despite shorter planned shutdown of Brazi power plant

¹ Centralized Electricity Purchasing Mechanism
